

This comment applies to ALL of the commercial stations in the Houston, Texas Broadcast area.

1. If frequency licensors (broadcasting companies like Infinity, Cox and ClearChannel) want to operate radio and television stations in our community, we insist they air material that is locally produced.
2. 97% of the music aired on commercial radio in Texas is not produced here, and the artists who perform the aired music do not even come here when they tour.
3. Programming decisions are not made with the community in mind, and local record labels and artists are excluded from consideration.
4. When they are compelled to air local views and music, they air it at 5:00am on Sunday morning. This is unacceptable. Local music should be aired at drivetime.
5. We resent being treated as nothing more than a profit center by these stations and their advertisers.
